

AMENDING HEAVY CLAY SOIL

To amend heavy clay soil, apply about 3" of coarse sand to the garden surface. Rototill or turn over by hand into the clay. Add about 8" of compost, or a good triple mix. Rototill lightly again. The soil should not be too fine. This will break up the clay almost immediately and permanently.

Visit Satellite Garden Centre today to pick up your sand, compost or triple mix.

Now you can get your garden growing successfully.
